# NEW MODEL! N 42' COIL STEEL CARS

Item #50 000 859  
N Scale Pre-production sample shown

**REMOVABLE HOOD**

The increased volume of coiled-steel transportation gave rise to a new purpose-built freight car. Previously rolls of coiled-steel had generally traveled in specially equipped gondola cars. In the 1960s a lighter type of car emerged specifically for hauling coils of steel in an integral trough. The car type gained popularity and eventually over 17,000 cars were built. Atlas' model replicates a 42' design with a distinctive fishbelly side sill.

- FEATURES INCLUDE:**
- Prototypical paint schemes & lettering
  - See-through walks
  - Removable hood
  - Inside floor detail
  - Cut levers

# NEW PAINT SCHEMES & ROAD NUMBERS! N 1932 ARA BOX CAR

A goal of the American Railway Association (ARA) in the early 1920s was to produce an all-steel box car that could be recognized as a standard by the member railroads. Although the original design presented in 1923 produced in excess of 60,000 cars, it wasn't until a new design was presented in 1932 that the member railroads gave their approval.

After extensively testing five prototypes in 1933, over 14,500 cars were produced for twenty-three railroads throughout the following decade. This design soon evolved into the 1937, Modified 1937, and Postwar AAR box cars.

Although not the most popular design produced, numerically speaking, the 1932 ARA Standard box car is considered one of the most important designs in railroad history.

Item #50 000 748 - Previous run shown

### FEATURES INCLUDE:

- Ready-to-run • Accurate painting and printing
- Friction-bearing trucks • AccuMate® couplers

ACCUMATE® couplers are made under license from AccuRail Inc.

### BODY STYLE FEATURES:

- Body Style 1: "Long tab" body, Murphy Panel roof, 4/4 Dreadnaught ends
- Body Style 2: "Long tab" body, 11 panel flat riveted roof, flat-riveted ends
- Body Style 3: "Short tab" body, Hutchins radial roof, 4/4 Dreadnaught ends
- Body Style 5: "Long tab" body, 11 Panel flat riveted roof, 4/4 Dreadnaught ends

# NEW PAINT SCHEMES! N 45' PINES TRAILER

Item #29046 - Pre-production artwork shown

Item #29049 - Pre-production artwork shown

During the late 1980s, the railroads had succeeded in making intermodal trailers a viable part of our transportation network. The then standard 45' trailer eventually gave way to the new 48' standard length. Pines, a trailer manufacturer of the period, offered an intermodal version of a 48' trailer that eventually became very popular with the railroads and private intermodal companies. Today, thousands of these trailers still ride the steel rails delivering packages and products all over the country.

## FEATURES INCLUDE:

- Two sets of landing gear—fully extended or retracted
- Hinges and latches
- Rear bumper detail
- Rivets

# OCT 2010 DEALER ORDER FORM

## N SCALE LASER CUT KITS!

"One of the things I think our customers will appreciate the most is the level of detail on these structures. The lasers are amazing and offer us a chance to provide an extremely well-done product at an affordable price that wouldn't be feasible in plastic. Also, there is very little start-up cost for any future projects. Once the design is finished, we can start producing a kit without worrying about creating a mold and switching it out. This method also allows us to produce the models on a case-by-case basis. As orders come in, they can be filled by loading up a program and pushing a button." - Jesse Shaffan Haedrich

The Self Storage Unit Kit is designed after common storage units that can be found coast to coast in America. These units can store a small car or the contents of a 4 room apartment. Includes two buildings per kit.

Approx. finished size (per building):  
1.9" long x 2.9" wide x .75" high.

The Section House is based on a section house built before the turn of the century in Binghamton, NY and is decorated in the authentic style of its time period.

Approx. finished size: 1.25" long x 1" wide x 1" high.

The Freight Station Kit is based on a freight station located in Clark Summit, PA, and built around the turn of the century. The loading platform is the perfect height for loading and unloading freight cars.

Approx. finished size: 6.75" long x 4" wide x 1.5" high.

[www.atlasrr.com/Trackmisc/nlasercut.htm](http://www.atlasrr.com/Trackmisc/nlasercut.htm)

ESTIMATED DELIVERY: 1ST QUARTER 2012

**PLEASE NOTE:** All kits are supplied unpainted and unassembled. Scenery and track not included.
